PROFESSIONAL SUMMARY

Detail-oriented Information Technology student and aspiring Full-Stack Developer with solid foundations in software engineering, database design, and data analytics. Competent in constructing structured web tools, handling state configurations, and developing localized systems across Python, React, and SQL platforms. Proven ability to integrate secure backend services and execute end-to-end data pipelines to address complex engineering problems.

TECHNICAL SKILLS

Programming Languages: Python, SQL, JavaScript
Frontend Development: React.js, HTML5, CSS3, Responsive Web Design
Backend Development: Python (Django, Flask), Node.js, Express.js, Authentication & Authorization
Databases & Cloud: PostgreSQL, MySQL, MongoDB, Supabase, Firebase
Data Analytics: Pandas, NumPy, Microsoft Excel, Data Analysis Pipelines
Tools & Frameworks: Git, GitHub, VS Code, Postman, Eclipse IDE

EDUCATION

Dhirajlal Gandhi College of Technology <i>Bachelor of Technology in Information Technology (CGPA: 8.5)</i>	Salem, Tamil Nadu 2023 – 2027
St. Mary’s Girls Higher Secondary School <i>Higher Secondary Education (HSE) (Score: 75%)</i>	Salem, Tamil Nadu 2023
St. Mary’s Girls Higher Secondary School <i>Secondary School Leaving Certificate (SSLC)</i>	Salem, Tamil Nadu 2021

KEY PROJECTS

- Smart Recruitment Enterprise Platform** | *React, Firebase, Supabase, React Router*
- Developed a production-grade interface featuring a secure glassmorphic authentication gateway using Firebase Auth.
 - Built a responsive UI with dynamic React Router pathing and a multi-language fallback matrix supporting English, French, Hindi, and Tamil.
 - Engineered localized routing logic and profiles data pipelines, dropping simulated scheduling overhead by up to 97%.
- Smart Veterinary Management System** | *React, FastAPI, Supabase, Python, OpenCV*
- Developed a multilingual healthcare platform enabling real-time animal patient check-ins and live data synchronization.
 - Integrated a Python FastAPI backend running computer vision algorithms to evaluate anomalies and calculate triage urgency.
 - Structured secure cross-role cloud security profiles using Row-Level Security (RLS) to enforce total data isolation.
- Government Land Records Encroachment Monitoring** | *GIS Tools, Python, Satellite Imagery*
- Developed a GIS-based land record management system designed to automatically detect unauthorized property encroachments.
 - Integrated geospatial analysis tools to cross-reference real-time land boundaries with official government registry datasets.
 - Streamlined land auditing processes via an automated alert workflow to significantly reduce manual inspection cycles.
- Enterprise Business Intelligence & Analytics Platform** | *Python, SQL, Pandas, Scikit-learn*
- Developed an end-to-end BI platform utilizing automated ETL pipelines to clean, transform, and analyze multi-domain data.
 - Built interactive visualization metrics and predictive models for sales forecasting, inventory analysis, and KPI monitoring.
 - Generated exploratory data reports and actionable insights using NumPy, Matplotlib, Seaborn, and Scikit-learn.

CERTIFICATES

IBM Data Fundamentals Certification – IBM	(2025)
UI/UX Design Certification – Novi Tech	(Aug. 2025)
Dr. Kalam Young Achiever Award – Participant Recognition	(Sep. 2025)
Python Core & Full-Stack Web Development Using Python – Infosys Springboard	(2024)
JavaScript Bootcamp Certificate – LetsGarde	(May 2024)
